From the desk of  
Dr. Harper

We are at a pivotal point in the program where everyone should be halfway through their courses. Right now, if the courses were closed and grades were transcribed, your child would receive the midterm grade on the course platform. Is this grade passing? Parents, please take a look and see. If your child is not passing, then now is the time to turn the academic table around and help your child take control of their learning. Right now, it is not too late, but it will be if we wait any longer. Don't forget, our teachers have office hours, so feel free to reach out to them for assistance and support. We are very impressed with the number of students who are passing. Keep up the great work!

For elementary students, we have been stressing the importance of the required TEAMS meeting. Students can not miss more than three sessions. If they have, they will be removed from the program regardless of their passing grades at the 9-weeks. There are many soft skills and direct instruction provided in this small window of time. We have 93% of our students participating, but I am concerned about the remaining 7%. Please reach out to me if you need help. We also have plenty of resources at our lab, and at tutoring; more information is on our website at <https://virtual.kana.k12.wv.us/>
